TANK 500

GWM is a globally renowned automotive manufacturer and the parent company of Tank, Cannon, Haval, and Ora.

At GWM, everything we do is grounded in our corporate philosophy: improving little by little, every day. From building world-class research and development systems that enable continuous innovation to following the 'excessive investment' principle that drives industry leadership, we put our philosophy into practice. We are proud to create vehicles that combine the best components, technology, and safety features from around the world, while producing attractive SUVs for customers who take their vehicles off-road and enjoy luxury urban travel.

TANK is our premium off-road SUV model series, which has taken the world by storm and is highly regarded as a premium yet capable 4x4. We attribute our success to passion, drive, and a strong commitment to listening to our customers.

SAZGAR is a symbol of Pakistani pride. Founded in 1991, the brand has always been driven by a customer-first philosophy. For over three decades, SAZGAR has led the way in manufacturing excellence and innovation, setting the benchmark for quality, reliability, and progress in Pakistan. Today, it stands as a gold standard, reflecting the very best of what Pakistan stands for.

SAZGAR quickly became a household name in Pakistan's automotive industry, backed by decades of experience, a thriving nationwide dealership network, and a portfolio of innovative, leading-edge vehicles that consistently meet and exceed the company's high standards. With a strong focus on the future, SAZGAR is proud to be Pakistan's first electric three-wheeler manufacturer and the only local OEM to export its 3 wheelers to over 25 countries, including the United States and Japan.

WHAT'S NEW IN **T**

INTRODUCING **Hi4T** TECHNOLOGY

Hybrid Intelligent 4WD TANK Hi4-T makes off-road vehicle "strong power and energy efficiency" and achieve "easy driving in all conditions and ultimate experience in all scenarios".

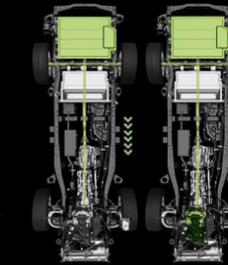

EV MODE:

Hi4T system prioritises electric power, delivering an NEDC EV range of 120km.

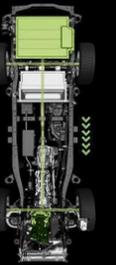

HYBRID MODE:

Hi4T ensures optimal fuel efficiency by intelligently balancing electric and fuel power, prioritising electric drive at lower speeds and fuel power at higher speeds.

INTELLIGENT

Automatically allocates electric and fuel power based on driving conditions and user demands, ensuring optimal performance.

Hi4T INTELLIGENT DRIVING MODES

Eco: Optimises power delivery and energy consumption to maximise fuel efficiency and electric range for everyday driving.

Normal: Balanced performance for daily use, offering smooth acceleration, comfort, and efficiency across varied driving conditions.

Sport: Sharp throttle response and enhanced power output for dynamic driving and confident overtaking.

Snow: Improves traction on slippery surfaces by reducing wheel spin and ensuring controlled power delivery.

Sand: Adjusts torque and transmission response to maintain momentum on loose and soft sandy terrain.

Rock: Delivers precise low-speed control and maximum torque for confident crawling over rocky and uneven surfaces.

Mud: Enhances traction by intelligently managing wheel slip on wet, muddy, and uneven ground.

Auto: Automatically selects the most suitable drive mode based on road conditions and driving inputs.

Expert+: Advanced off-road settings for experienced drivers, offering enhanced control and system optimisation in extreme conditions.

4H (Four-Wheel Drive High): Engages Four-wheel drive by locking center diff for improved stability.

4L (Four-Wheel Drive Low): Activates low-range gearing for maximum torque and control in steep, rough, or demanding off-road situations.

Expert Mode: Allows manual control over key vehicle systems, enabling drivers to customise performance based on terrain and personal driving style.

*Pure Electric Drive: Powered solely by the electric motor, this mode offers smooth, quiet and responsive driving which is ideal for city commuting.

*Direct Drive: At high speeds or during overtaking, the engine drives the vehicle directly, delivering strong acceleration while reducing battery usage.

*Parallel Drive: When you need instant power, the engine and motor work together, delivering maximum performance to the wheels.

*Energy Recovery: Every time you slow down, brake, or drive downhill, kinetic energy is recovered to recharge the battery and improve efficiency.

TECHNOLOGY THAT LEADS

TANK is engineered for those who expect more. Beyond commanding performance and a refined, premium cabin, it delivers a powerful engine, advanced drivetrain, and intelligent systems working in perfect harmony.

The Tank 500 features a sophisticated 2.0L Turbo Hybrid Engine, delivering not just remarkable horsepower and torque, but smooth, reliable performance through its 9HAT Automatic Hybrid Transmission.

Every journey becomes effortless, letting you focus on the destination and not the drive.

Tackle all terrains with the Tank 500, thanks to its impressive array of 11 driving mode options, triple-lock automated differential system, and the superior GWM intelligent Hi4-T 4x4 technology

Ensuring an unparalleled level of confidence and control wherever the road takes you.
